

Solar Lamp Instruction Manual

Solar light is a green and environmentally friendly product. The product generates solar energy by absorbing sunlight, and then converts it into electrical energy and stores it in the built-in rechargeable battery. It can be installed in gardens, lawns, etc., and can make your home light up without wiring.

1. Working principle: When there is sunlight during the day, the solar light is off, the battery is automatically charged, and the light is automatically turned on when it is dark.
2. Test whether the lamp is normal: After turning on the switch, completely cover the solar panel with a thick object to check whether the lamp works normally.
3. Support USB charging.
4. Care and maintenance: Tear off the protective film on the solar panel before use, please remove the stains on the solar lamp regularly to ensure the best charging effect of the solar energy
5. Charging time: Solar panel 10H, DC-USB 4H. Workingtime: 10-12H.
6. Built-in items: one lamp, one USB cable.
7. Solar panel function indication as below picture:
